Position Title: Designer/Draftsperson

Office Location: Kanab, Utah

Term: Full Time

Compensation: Based on experience. Paid Holidays, 401(k), Performance Bonuses.

Job Description

Iron Rock Group is looking for skilled designers and drafts-people to assist our team of architects and engineers in designing and developing designs and technical drawings for a variety of construction projects throughout Southern Utah and Northern Arizona.

This individual will train with and act under Iron Rock's Architectural Design Director. They will participate in and oversee residential design development for custom residences and remodels. They will also be involved throughout the entirety of Iron Rock's technical drawing and document development process for both residential and commercial projects, bidding processes, and construction administration.

Responsibilities

- Collaborate and liaise with architects, engineers, and clients to gather project criteria and establish design objectives and goals
- Engage in architectural design processes assisting and overseeing projects moving through conceptual, schematic, and design development stages of architectural design
- Produce presentation quality schematic drawings for inhouse and client critique and review
- Use various CAD based software to develop construction drawings and plans for numerous types of construction projects
- Visit potential construction sites to meet with clients and/or obtain project criteria
- Visit project sites under construction for quality control and reporting of progress

Requirements & Skills

- Proven work experience with drafting or technical drawing development
- Proficiency w/ CAD based programs such as AutoCAD, Revit, Rhino, etc.
- A thorough understanding of construction-based mathematic and geometric standards & skillsets
- Ability to meet deadlines

- High levels of professional and interpersonal communication skills
- At least one year of experience under an architect, engineer, or contractor engaged in construction related responsibilities, trades, or labor
- High attention to detail and a commitment to quality work and craft

Iron Rock Group is a multi-disciplinary design group that specializes in architectural design, engineering, surveying, and testing for all types of construction within the greater Southern Utah and Northern Arizona region. The Iron Rock team is a tight-knit, hardworking, lighthearted, and extremely versatile group of individuals that demonstrates competency at every scale of construction on everything from smaller residential to large hospitality, governmental, and master planning, and development.

Iron Rock Group is headquartered in Kanab, a small, tourism town located near the border of Arizona and Utah. Although not a requirement by any means, our team has found great success employing individuals with a passion for the region. Southern Utah especially, offers many forms of outdoor recreation, beauty, and interests and Iron Rock is constantly engaged with projects based on these opportunities. We invite any individuals who want to love where they live and have the necessary requirements and skillsets to apply for this position.
